

I'm writing to express my concern about the FCC's considered action to disband New Jersey's "Do Not Call" legislation. I urge the commission to leave the current law intact, and left as-is. Being a resident on NJ who has been annoyed by telemarketers in the past, I've found the regsitration to be very effective in greatly reducing unsolicited calls from marketers. This has enhanced and preserved the peace in our household by not unneccesarily disturbing us with unwanted phone calls.
